SalsaJ (Such a Lovely Software for Astronomy) Tips for Installation for MACs

Java

Before installing Salsa J you have to make sure that you have Java installed

Núcleo Interactivo de Astronomia

•••			System Pr	eferences		QSearch	
9	Rosa Doi Apple ID, iClo	"ƏN ud, Media & Apı	p Store			Apple ID	Family Sharing
General	Desktop & Screen Saver	Dock	Mission Control	Siri	Spotlight	Language & Region	Notifications
Internet Accounts	Users & Groups	Accessibility	Screen Time	Extensions	Security & Privacy		
Software Update	Network	Bluetooth	Sound	Printers & Scanners	Keyboard	Trackpad	Mouse
Displays	Energy Saver	Date & Time	Sharing	Time Machine	Startup Disk		
Flash Player	Java						

If you don't have Java take the following steps

• Go to https://www.java.com/, download and install the program

Installation

Open the webpage http://www.euhou.net/ and click on software

Installation

You will need to start with the basic version of the software.

You can choose with or without images associated.

Choose the one adequate to your operating

Change the extension of the filename .zip into .jar and put it in the plugin directory.		Download from this link
		Change the extension of the filename .zip into .jar and put it in the plugin directory.

NUCLIO Núcleo Interactivo de Astronomia

First part of installation

Install the file you have downloaded in your computer

You will find a dmg file as can be seen here

Click on it with the right side of your mouse and choose the copy SalsaJ option

You will then have a folder like this one that you need to locate in your computer. Probably it is in your desktop

INSTRUCTIONS FOR MAC ONLY

If that doesn't work. Create a new folder called Salsa J (for instance in your desktop to make it easy to locate it). You will have to rename the folder manually

INSTRUCCTIONS FOR $MAC \ ONLY$

Click on the installer

A folder will appear like this

Copy all the files to the new folder you have just created

INSTRUCCTIONS FOR MAC ONLY

You should now have a folder with all the elements in your desktop

Go back to Salsa J download page. But this time download the new version of SalsaJ.jar

This will bring a zipped file (SalsaJ.jar.zip) that you will have to unzip (decompress) in order to extract

Now copy the new SalsaJ.jar and replace the one in the Salsa J folder (that you have created in your desktop)

For the first time you try to launch the Salsa.jar you might get a message like this one.

In that case open it with the right side of your mouse and choose the Jar Launcher

0

0

Then click open in this security message

macOS cannot verify the developer of "SalsaJ.jar". Are you sure you vant to open

By opening this app, you will be over iding system security which can expose your computer and personal information to malware that may harm your Mac or compromise your privacy.

Chrome downloaded this file today at 13:13 from

Open

Et Voila !!! You have your Salsa J properly working

If you would like to have an easy access to Salsa J from your applications just move the folder to your Applications
